CLAIM AMENDMENTS

Claims 1, 2, 4, 7-12, 15-18 and 20 are pending. claims 3, 5, 6, 13, 14 and 19 have been canceled. claims 1, 8, 10 and 18 are amended herein.

1. (currently amended) A multi-use tool comprising: 1 a single housing, said housing comprising a at least one compartment or more compartments; 2 a grip for carrying said multi-use tool; 3 a tape measure; 4 a straight edge rotatably disposed to pivot about a center point; [[and]] 5 a pencil holder forming within a compartment formed within one of said compartments, said 6 pencil holder holding a removable pencil; 7 a laser generator disposed in within one of said compartments, said laser generator producing 8 a visible laser beam as a reference line; and 9 a pencil sharpener disposed on one end of said multi-use tool and forming an outlet for said 10 11 visible laser beam. 2. (original) The multi-use tool as set forth in claim 1, further comprising: 1 at least one level for providing angular, horizontal and vertical information. 2 3. (canceled) 1

- 4. (original) The multi-use tool as set forth in claim 1, further comprising:
 - a tightening device disposed about said center point, said tightening device applying an adjustable pressure on a surface portion of said straight edge for holding said straight edge at a desired angle.
 - 5. (canceled)

- 6. (canceled)
- 7. (original) The multi-use tool as set forth in claim 1, further comprising a detent mechanism disposed between said housing and said straight edge, said detent mechanism providing a tactile response to a user indicating when said straight edge has been rotated about said center point a predetermined amount.
- 8. (currently amended) The multi-use tool as set forth in claim 1, further comprising measurement markings for indicating predetermined measurements, said measurement markings being disposed along at least one side of said housing and at least one side of said straight edge.
- 9. (original) The multi-use tool as set forth in claim 1, said straight edge having a circular edge about said pivot point, said straight edge comprising measurement markings for indicating predetermined measurements, said measurement markings being disposed along said circular edge.

1	10. (currently amended) A multi-use tool comprising:
2	a single housing, said housing comprising at least one compartment plural compartments;
3	a tape measure disposed at a first end of said housing in a first of said compartments;
4	a pencil holder forming a second one of said compartments, said pencil holder holding a
5	removable pencil; [[and]]
6	a pencil sharpener disposed on a second end of said housing; and
7	at least one laser generator disposed in a third one of said compartments, said laser generator
8	producing at least one visible laser beam as a reference line, said laser beam being projected through
9	said pencil sharpener.
1	11. (original) The multi-use tool as set forth in claim 10, further comprising an ergonomic
2	handle for assisting a user in carrying or moving said multi-use tool.
1	12. (original) The multi-use tool as set forth in claim 10, further comprising at least one level
2	for providing angular, horizontal and vertical information.
1	13. (canceled)
1	14. (canceled)
1	15. (original) The multi-use tool as set forth in claim 10, further comprising a straight edge
2	rotatably disposed in a sub-compartment about a center point.

	13/011
1	16. (original) The multi-use tool as set forth in claim 10, further comprising at least one side
2	of said housing having a static coefficient of friction greater than the remaining sides of said housing
3	for assisting a user of said multi-use tool to operate said tape measure single handedly.
1	17. (original) The multi-use tool as set forth in claim 10, said tape measure being removable
2	from said first one of said compartments.
1	18. (currently amended) A multi-use tool comprising:
2	a single housing, said housing comprising a plurality of compartments;
3	a tape measure disposed at a first end of said housing in a first one of said compartments;

- a pencil sharpener disposed on a second end of said housing; and
 - a laser generator disposed in a third one of said compartments, said laser generator producing at least one visible laser beam projected through said pencil sharpener.

at least one level for providing angular, horizontal and vertical information;

a pencil holder forming a second one of said compartments, said pencil holder holding a
